題目 (Title):

發展以實證為基礎的物理治療臨床執業指引
(Developing Evidence-Based Physical Therapy Clinical Practice Guidelines)

(Assistant Professor, Graduate Institute of Early Intervention, Chang Gung University,
Tao-Yuan, Taiwan)

目的 (Purpose):

提供發展以實證為基礎的臨床執業指引(CPGs)之建議策略。
(Recommended strategies for developing evidence-based clinical practice guidelines
(CPGs) are provided.)

關鍵點 (Key Points):

本文目的為在美國物理治療學會小兒部門的支持下，依循相同的發展程序發展未來的臨床執業指引(CPGs)，以期達到一致的品質和表現。本文概述發展 CPGs 流程之步驟，以及提供資源，以利於 CPG 發展者可以順利完成他們的任務。這些建議的流程對來自於具有相似結構、目標和資源的組織代表之 CPG 發展者是有用的。

(The intent is that future CPGs developed with the support of the Section on Pediatrics of the American Physical Therapy Association would consistently follow similar developmental processes to yield consistent quality and presentation. Steps in the process of developing CPGs are outlined and resources are provided to assist CPG developers in carrying out their task. These recommended processes may also be useful to CPG developers representing organizations with similar structures, objectives, and resources.)
