

The 2nd Multinational Online Exchange

Same Roots, Different Branches -Evolving the Role of Physiotherapists in Public Health-

What are the public health needs for physiotherapists? Physiotherapists have developed the unique scope of our profession in each of our own countries in the UK, Indonesia, Singapore, and Japan. In this event, we have invited the speakers from each physiotherapy association, and are going to explore our role in public health through exchanging ideas and opinions on the differences and similarities in physiotherapy formed by cultural and social backgrounds, advanced approaches, and specialized fields.
